

differential cross-section,  $\beta^* = 1000$  m:

- ▲ data points with statistical unc.
- ▨ full systematic uncertainty band
- ▩ syst. unc. without normalisation

differential cross-section,  $\beta^* = 90$  m:

- ▼ data points with statistical unc.
- ▨ full systematic uncertainty band
- ▩ syst. unc. without normalisation

fits:

- Cahn/KL, constant
- Cahn/KL, peripheral
